

实战一：输出"人因梦想而伟大"

使用print()函数在命令行窗口输出小米董事长雷军的经典语录"人因梦想而伟大"

The image shows a terminal window with a dark purple background. The title bar at the top reads "neko@ubuntu: ~/Desktop/作业". The first line of code is "1 print('人因梦想而伟大')". The terminal has a scrollbar on the right side. At the bottom, there is a status bar that says "-- INSERT --" on the left, "1,29-22" in the middle, and "All" on the right.

```
neko@ubuntu: ~/Desktop/作业
1 print('人因梦想而伟大')
```

-- INSERT -- 1,29-22 All
